Globális katasztrófakárok

Global Weather Disaster Losses as Percent of Global GDP: 1990-2023

(Sources: Munich Re, World Bank & updated from Pielke 2019)

THB

Klíma-vonatkozású elhalálozások: 1920-2023

Deaths have declined 98% because richer and more resilient societies reduce disaster deaths. This swamps any potential climate signal

OFDA/CRED International Disaster Database, <https://public.emdat.be>, deaths averaged over decades 1920-29, 1930-1939, ... 2010-2019 placed at decadal midpoints (1924.5, 1934.5 etc), with average data for 2020-22 placed at 2021.5. 2023 is not finished, so adjusted for the historical fraction of deaths from Jan-Aug compared to full year for 2000-22. Update of Fig. 17 from <https://www.sciencedirect.com/science/article/pii/S0040162520304157>.

John Clauser, fizikai Nobel-díjas 2022-ben

Nobel Prize winner Dr. John F. Clauser signs the Clintel World Climate Declaration

John F. Clauser, winner of the **2022 Nobel Prize in Physics** for his work on quantum mechanics, has decided to sign the **World Climate Declaration** of Clintel with its central message “there is no climate emergency”. Clauser is the second Nobel Laureate to sign the declaration, Dr. Ivar Giaever was the first. The number of scientists and experts signing the World Climate Declaration is growing rapidly and now approaching 1600 people.

Clauser has publicly distanced himself from climate alarmism and this year he also **joined** the Board of Directors of the CO₂ Coalition. In the announcement by the CO₂ Coalition, Clauser was quoted in the following way:
